Mini Pipe Sealing Bags 2.5 bar (36.25 psi)

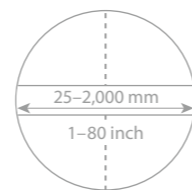

The small flexible.

- › extremely short design
- › easy handling
- › extremely expandable
- › up to 1 bar (14.5 psi) counter-pressure

Pipe Sealing Bags

The classics.

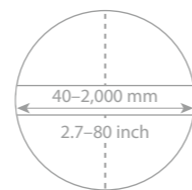

- › wide product range
- › only 3 sizes from 100–1,000 mm
- › very flexible due to the material
- › easy handling, because lightweight and short

New: 50/100 now in 2.5 bar (36.25 psi) operating pressure available

Test Sealing Bags

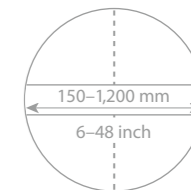

The inspectors.

- › flexible and sturdy design
- › only 3 sizes from 100–1,000 mm
- › for tests according to DIN EN 1610
- › lighter than test bags with inside core

Flexible packers

The adaptable solution.

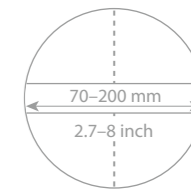

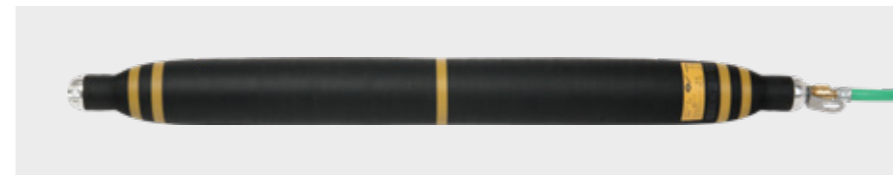

- › high flexibility
- › skid-shaped carriage allows sliding even over offsets
- › adjustable carriage with resilience

New version!

Lateral packers 2.5 bar (36.25 psi)

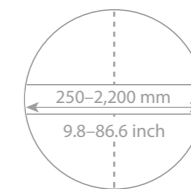

The intelligent solution that saves money.

- › high flexibility
- › sturdy spherical heads
- › Construction allows very good bending characteristics & increased slipping qualities

Cone sealing bag 1 bar (14.5 psi)

The tight solution for every profile.

- › Shape allows for flexible use in almost all pipe profiles
- › easy to handle thanks to its light weight
- › securely seals all pipelines
- › available in four sizes from 250–2,200 mm
