High-pressure leak sealing system

- Innovation from Vetter
- Sealing in difficult-to-access places
- For leaks in pipes with diameter up to 20 cm (8 inch)

Intelligent hose system for complicated pipe leaks.

In close collaboration with Henkel KGaA, Dusseldorf, Vetter has developed an intelligent sealing hose system. Now you can effortlessly access even hard-to-reach leaks in narrow or unevenly shaped piping systems.

The flexible hoses fit perfectly even over complicated leaks, e.g. at T-pieces, pipe bends, connecting branches and welded seams. The hoses are inflated in seconds.
Technical data

- Working pressure: 14 bar (203 psi)

Accessories

- Inflation with cylinder
- Inflation with alternative air source

In operation...

- Can be used on T-pieces, pipe bends or difficult- to- access connecting branches
- For leaks in pressure lines or fittings

Good reasons...

- Universally usable and easy to use
- Additional sealing plates for extra stability
- Sealing hoses with electrostatic conductivity (DIN ISO 8031/8.97)

Guaranteed quality:

- Individually tested (with inspection seal)
- Earth connection to sealing hose coupling on both sides
- All metal parts made of stainless steel
